

INFORMATION RELEASE

RELEASE DATE 29th July 02

Problem with Virtual Terminals and Caldera Open UNIX 8

*****WARNING WARNING WARNING WARNING WARNING *****

OVERVIEW:

There is a problem when using virtual terminals in UniVision on Caldera Open UNIX 8. Virtual terminals can still be used in UNIX but there appears to be a problem with file id's being consumed when using them within UniVision. This could result in data corruption and GFE's

Until further notice do **NOT** log any virtual terminals on Caldera Open UNIX 8 into UniVision
